## **ACKNOWLEDGEMENT**

The successful completion of this project would not have been possible without the constant support and guidance of many individuals. First and foremost, I thank Software Developers across the globe building amazing open source projects such as Flutter, React, etc. that became the foundation of this project. I am highly indebted to my institution, Mary Matha Arts and Science College, Mananthavady for providing me with the necessary facilities to work on this project. I would like to extend my sincere gratitude to Dr. Maria Martin Joseph, the principal, and Ms. Jisha T E, Head of Department, PG and Research Department of Computer Science, for their constant support. I would also like to thank my guide Mr. Sabu O J, for the valuable guidance throughout this project work. I also thank the Management and the staff of Mary Matha Arts and Science College, Mananthavady for providing me with an opportunity to do the project work. Last, but perhaps most important, I thank my parents, family members, and friends for their love and continuous support without which this work would never have been done.

**SREELAL TS**

## **ABSTRACT**

The Edakkal Caves Ticket Booking System represents a collaborative initiative between the District Tourism Promotion Council (DTPC) and the Incubation & Innovation Cell at Mary Matha Arts & Science College, Mananthavady. This project, driven by the vision to enhance the visitor experience to the historical Edakkal Caves in Wayanad, Kerala, introduces an efficient and user-friendly ticket booking system. The system comprises two integral components: the Admin App and the User Portal. The Admin App, built with Flutter and Firebase, empowers DTPC agents with on-site booking management and verification capabilities. Simultaneously, the User Portal, developed using ReactJS and Firebase with Razorpay integration, provides tourists with a seamless online ticket booking experience. Visitors can effortlessly navigate the web application, explore details about Edakkal Caves, and reserve tickets for a specified date and time. The integration of Razorpay ensures secure and hassle-free transactions. The historical significance of Edakkal Caves, coupled with the advanced technology employed in this project, aims to make the site more accessible and enrich the overall tourism experience. This collaborative effort between the tourism sector and educational institutions exemplifies the potential of leveraging technology to preserve and promote cultural heritage, creating a model for future projects at the intersection of tourism and technology.
